

INFORMATION

- Compact and lightweight Fresnel instrument that follows the same design philosophy of the larger K5600 Alpha fixtures.
- Accepts both Quartz Metal Halide Lamps (HMI) and Ceramic Discharge Lamps, allowing it to now project in both 3200K and 5600K color temperatures simply by changing lamps.
- Can be used with a drop-in lens with 10-60 degree focusing range or with clear Pyrex to give even 90 degree output that produces crisp and hard shadows.
